

GUARDIAN

Guardian Gen 2 - Software Version 1.4.7 Release and Safe Launch Plan Postponed

Dear Colleague,

As you are aware, phase 1 of the [Software \(SW\) version 1.4.7 Safe Launch Plan \(SLP\)](#) was scheduled to commence next week.

Please be advised this release will now be delayed, to allow for the implementation of an improvement into how Over The Air (OTA) updates are downloaded and installed by the Gen 2.1 unit. This improvement will not impact how SW version 1.4.7 is downloaded but will improve performance for future updates.

The expected delay to SW version 1.4.7 release is 2-3 weeks to allow for standard development and test processes.

Although the delay is regrettable, this software development will improve future OTA implementations.

We appreciate your patience and will notify you when the revised SW version 1.4.7 SLP has been cleared for commencement.
