

KEEP YOUR DRIVERS SAFE AND GET YOUR VEHICLES BACK ON THE ROAD QUICKER.

Seeing Machines offers training to upskill your maintenance teams, enabling them to diagnose and rectify issues with the Guardian system and perform installations where required. Building internal capability gets your vehicles on the road quicker and ensures your drivers are always protected.

WHICH GUARDIAN TRAINING COURSE IS RIGHT FOR YOUR STAFF?

GUARDIAN MAINTENANCE TECHNICIAN

A Guardian Maintenance Technician can log on to the controller and perform simple functions that cannot be completed over the air (virtually).

- ✓ Provides basic maintenance to Guardian systems
- ✗ Not permitted to touch anything related to the system power, nor remove or replace components
- ✗ Not required to be a certified auto-electrician

GUARDIAN INSTALLATION TECHNICIAN

A Guardian Installation Technician can conduct a full system installation (hardware and software) and perform Guardian system maintenance.

- ✓ Installs Guardian system (hardware and software)
- ✓ Provides on-site product and system maintenance
- ✓ Upon completion will be certified as a Guardian Installation Technician G2

This training is suitable for staff who

- ✓ Are local to the vehicles
- ✓ Have skills in using basic power tools and taking apart some components
- ✓ Are comfortable with menu driven software
- ✓ Have skills and experience installing electronic systems in vehicles for commercial use, or
- ✓ Have completed a relevant qualification in their respective country

This training consists of

- ✓ Online course **8 modules (approximately 3 hours)**
- ✓ Maintenance Technician exam
- ✓ Online course **8 modules (approximately 3 hours)**
- ✓ On Job Training (OJT) with an Installer Trainer
Available virtually or in-person

This training enables your staff to

Perform common maintenance tasks on the Guardian system
